Scan ID via Barcode

The Olympus SC-1 Barcode Scanner Module enables automatic allocations of voice files to unique case, client or patient records. It eliminates the possibility of mistyping to ensure 100% conclusive and secure identification. This therefore boosts workflow efficiency, effectiveness and veracity. The SC-1 Barcode Scanner Module has been specifically designed for use with both the Olympus DS-5000 and DS-5000iD. These top-of-the-range voice recorders incorporate numerous state-of-the-art features to offer flexible solutions that enhance productivity in all small, medium and even large enterprises.
